OVERVIEW

Senior full-stack developer with more than **9 years** of hands-on experience designing, developing, and implementing scalable web applications and internal tools that drastically improve efficiency in state and private companies, these years have allowed me to evolve and advance in the field of IT.

The chance to work in a large company ensures the continuity of professional training, which help me be up to date with new technologies, and to practice them on site, either in building managements applications and web solutions.

Finding, proposing and implementing solutions in the context of carrying out my work is my complete satisfaction.

Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack
